

Inmate Medical Financial Solutions for Washington State Counties

“Simple. Transparent. Cost-Effective.”

Options for inmate medical protection and a discounted pharmacy program are now available to all Washington State counties. This is the solution to help protect counties against large and unpredictable financial exposure for inmate medical expenses. There are two packages to choose from:

| Features | Package 1 | Package 2 |
|---|-----------|-----------|
| Complete claims screening and processing | ✓ | ✓ |
| Eligibility verification | ✓ | ✓ |
| Billing and premium remittance | ✓ | ✓ |
| Discounted prescription drug program and rebates through RESTAT | ✓ | ✓ |
| Insurance coverage for claims in excess of \$10,000 | | ✓ |

There are no consulting fees, hourly charges or setup fees. The claims processing service involves no upfront cost at all: the administrator's fee is a percentage of claims savings the administrator is able to achieve. There is also a per-script dispensing fee for the pharmacy program. Insurance coverage in Package 2 is provided at a low flat per-inmate/per-day fee paid on a monthly basis.

The claims processing service is provided by a third-party administrator specializing in inmate medical. The program is put together and managed by Gallagher Benefit Services, a benefits consulting firm specializing in the public sector. The program is endorsed by WSAC Financial Services Corporation (WSAC FSC).
